SIR,

Subject - Laying underground sewer lines to the layout of New Kalasipalyam Extension.

I have the honour to state that the Municipal Council at their meeting held on 5-4-1948 have approved the estimate for Rs.45,600/- furnished by the Chairman, City Improvement Trust Board, for the above work. The expenditure in this respect will be met from the provision of Rs 1,75,000/- set apart in the current years budget for the works connected with this layout.

I request that early sanction of Government may kindly be obtained to the estimate approved by the Council.

A copy of the council resolution along with the estimate and its enclosure are sent herewith for favour of reference and return.

Forwarded with compliments

K Shanmugam Mudaliar
Honorary President.

Hon President 2/4

REPORT TO ACCOMPANY THE ESTIMATE FOR PROVIDING UNDERGROUND DRAINAGE TO THE NEWLY FORMED KALASIPALYAM TO THE EAST OF JAYACHAMARAJENDRA WADIYAR ROAD AND TO THE SOUTH OF MAVALLI TANK BUND ROAD

The above layout has been proposed to be sewered by gravity on the following obligatory levels and gradients

The Sub Mains have been proposed one along the 1st Main Road and another along the 2nd Main Road and are connected to M H No 38 of Visveswarapuram Main and M H 21 of Main Sewer respectively

A gradient of 1 in 200 has been proposed for both the sub-mains and a section of 9" dia has been proposed This can discharge o 55 cusecs with a velocity of 2 51 R Ft Though the maximum discharge that could be expected from this layout is 13 cusecs it is found obligatory to provide a 9" dia with the admissible gradient of 1 in 200

Street sewers have been designed with reference to these two sub-mains A maximum gradient of 1 in 120 has been adopted for sewering the entire area by gravity In places where the depth of cushion above the pipe line is less than 2' provision has been made for laying cast iron pipes The formation level of the road is to be kept as far as possible 3' above the invest which gives a cushion of about 2¼' over the pipe

The accompanying estimate provides for laying 2020 R Ft of 9" dia sewer line including 14 junction of 9" x 4" and 40 R Ft of cast iron pipe required for crossing Flood water main drain

Provision has been made for laying 4480 R Ft of 7" dia sewer line which includes 2220 R Ft of 7" dia cast iron pipe required in places where there is less than 2" of cushion and 176 S W junction pipes required for house connections - 31 junction chambers have been provided for house connections where cast iron pipe is proposed

30 man-holes of depths varying from 3' to 7' have been provided in the estimate

Lumpsum provision for items such as providing extra concrete for man-holes and laying jelly bed below pipe line in soils where heavy percolation is met with etc , is made in the estimate The current schedule of rate has been adopted for the several items of the estimate

The estimate amounts to Rs 45,600/- including unforeseen items, contingencies, temporary establishment and establishment tools and plant charges etc
